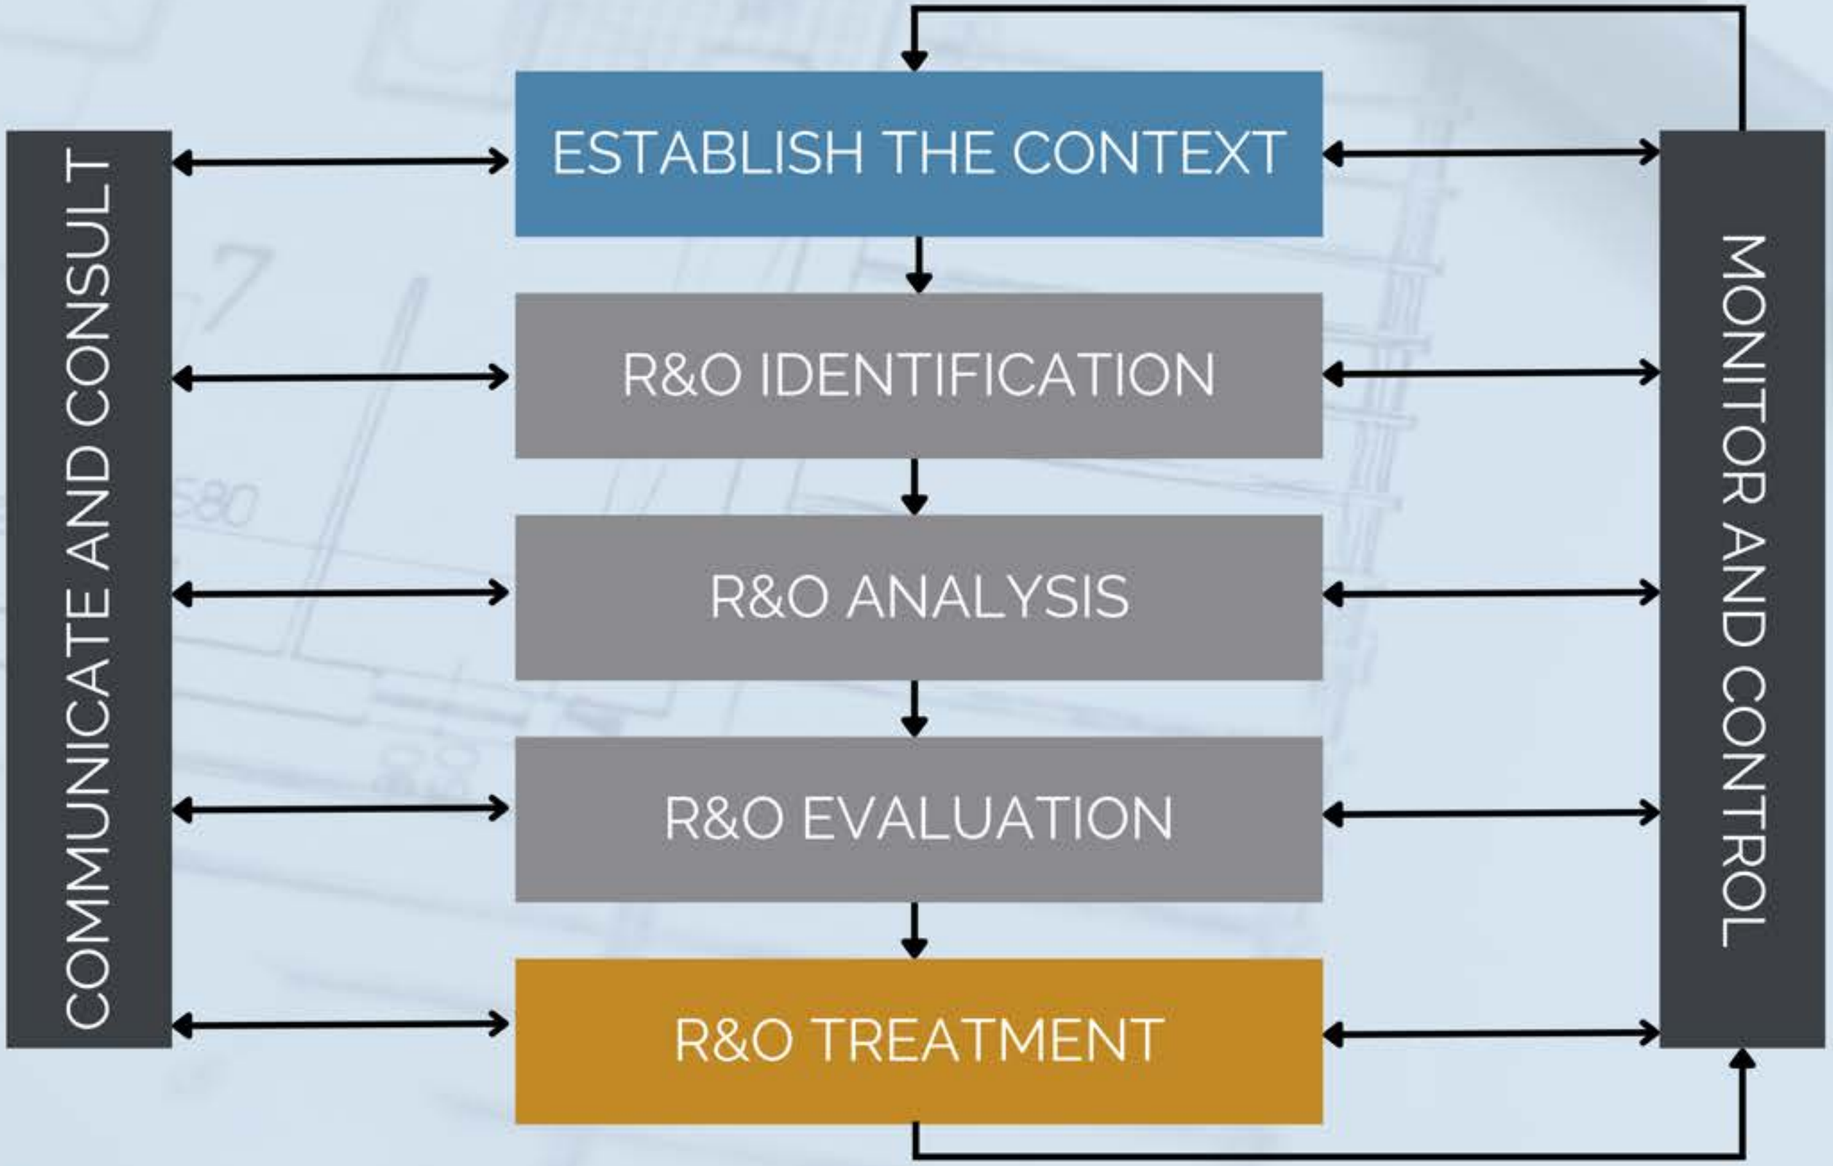
HEALTH, SAFETY AND THE CONSTRUCTION INDUSTRY

Risk Management Process - series of defined steps to identify, analyse, evaluate and treat risks

RISK MANAGEMENT PROCESS



CONTEXT

- Customize the risk management process
- Scope - what is being delivered
- Context
- Outcomes - what does success look like

RISK ASSESSMENT

Generate a comprehensive and ranked list of uncertainty that matters - Risk Register

RISK ASSESSMENT

- **Identification** - what are the risks?

- **Analysis** - what is the impact on the project?

- **Evaluation** - which risks matter?

TREATMENT

- Select an option for addressing the risk
- Planning a risk response
- Develop a strategy for achieving an above-the-line control for each risk
- Hierarchy of controls

MONITOR & CONTROL

- Projects are dynamic and risk management should reflect this
- Implement risk responses and determine effectiveness
- Identify and assess new risks during delivery
