CRANES AND LIFTING

WHY USE CRANES?

- Lifting heavy loads
- Accessing difficult area
- Versatility
- Ease of use

TYPES OF CRANES

TOWER CRANE

MOBILE CRANE

CRAWLER CRANE

HIAB TRUCKS

HAZARDS

- Collapse or tip-over
- Swing radius
- Electrocution
- Falling objects
- Structural failure
- Operator error

CONTROLS

- Trained and competent personnel
- Lift plan/permit
- Co-ordination
- Plant inspection and certification

LIFT STUDY

- Determine how the crane is to be set up for the intended operation
- Crane capacity, load details, boom length, ground conditions, etc.
